natural killer cell tumor-recognition protein - mouse
N;Alternate names: cyclophilin-related NK-tumor racognition protein; natural kil
C;Species: Mus musculus (house mouse)
C;Date: 17-Uul-1994 #sequence_revision 17-Jul-1994 #text_change 05-Nov-1999
C;Accession: B47328; I77662
R;Anderson, S.K.; Gallinger, S.; Roder, J.; Frey, J.; Young, H.A.; Ortaldo, J.R.
Proc. Natl. Acad. Sci. U.S.A. 90, 542-546, 1993
A;Title: A cyclophilin-related protein involved in the function of natural kille
A;Reference number: A47328; MUID:93133824
A;Accession: B47328
A;Status: preliminary
A;Molecule type: mRNA
A;Residues: 1-1507 <AND>
A;Cross-references: GB:L04289; NID:9192866
A;Note: authors translated the codon AGT for residue 972 as Arg

vacuolar protein VAC7 - yeast (Saccharomyces cerevisiae)
N;Alternate names: protein N2467; protein YNLO54w
C;Species: Saccharomyces cerevisiae
C;Date: 27-Apr-1996 *sequence_revision 03-May-1996 *text_change 07-May-1999
C;Accession: S62982; S58722; S68168
R;Bergez, P.; Dolynon, F.; Crouzet, M.
submitted to the Protein Sequence Database, April 1996
A;Reference number: S62975
A;Accession: S62982
A;Molecule type: DNA
A;Residues: 1-1165 <BER>
A;Cross-references: EMBL:Z71330; NID:g1301918; PID:e239893; PID:g1301921; MIPS:YNL054
A;Experimental source: strain S288C

RESULT S62982

```
A;Map position: 14L
C;Function:
A;Description: required for normal vacuole inheritance and
C;Keywords: transmembrane protein; yeast vacuole
E;925-941/Domain: transmembrane #status predicted <TMN>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     A;Cross-references: EMBL:U12141

microtubule-associated protein homolog - fruit fly (Drosophila mela. N; Alternate names: hypothetical protein EG:49E4.1
C:Species: Drosophila melanogaster
C; Date: 13-Aug-1999 #sequence_revision 13-Aug-1999 #text_change 17-;
C; Accession: T13564
R:Spanos, L.; Papagiannakis, G.; Siden-Kiamos, I.; Louis, C.
submitted to the EMBL Data Library, April 1999
A; Description: Sequencing the distal X chromosome of Drosophila mel.
A; Reference number: 217689
A; Reference number: 217689
A; Status: preliminary; translated from GB/EMBL/DDBJ
A; Rocession: T13564

F90073
Fypothetical protein SA2447 [imported] - Staphylococcus aureus (strain N315)
C;Species: Staphylococcus aureus
C;Date: 10-May-2001 #sequence_revision 10-May-2001 #text_change 22-Oct-2001
C;Accession: F90073
R;Kuroda, M,;Ohta, T.; Uchiyama, I.; Baba; T.; Yuzawa, H.; Kobayashi, I.; Cui, L.; Oma, A.; Mizutani-Ui, Y.; Kobayashi, N.; Sawano, T.; Inoue, R.; Kaito, C.; Sekimizu, K.
C.; Shiba, T.; Hattori, M.; Ogasawara, N.; Hayashi, H.; Hiramatsu, K.
Lancet 357, 1225-1240, 2001
A;Title: Whole genome sequencing of meticillin-resistant Stapylococcus aureus.
A;Reference number: A89758; MUID:21311952; PMID:11418146
A;Accession: F90073
A;Accession: F90073
A;Status: preliminary
A;Residues: 1-2271 <KUR>
A;Coross-references: GB:BA000018; PID:g13702612; PIDN:BAB43752.1; GSPDB:GN00149
A;Experimental source: strain N315
C;Genetics:
A:Genetics: A; Gene: SA2447.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                DB
